

# Today's Live New Mexico News BUSINESS MEN IN FALL MOVEMENT OF GALLUP RAILROAD MOVEMENT FOR CATTLE WILL BE COMMENCE SOON SAFETY OF TAX LEAGUE

Shipping Resumed In Southwest New Mexico Last Week With Big Trades To Be Closed Early In September.

Gallup, N. M., Aug. 9.—Gallup folk expect the improvements long contemplated by the Santa Fe here to commence about August 21. The Santa Fe right of way man, G. W. Mattie, has secured deals to all the land necessary for the first block of improvements.

The first work, it is thought, will be that of constructing the new 334 stall roundhouse. Possibly as soon as the first of the year work will begin.

The early start will assure the completion of the work to an advanced stage before cold weather sets in and trouble can be expected with concrete.

Along with the round house construction the work of diverting the course of the Puerco will also be taken up at once. The old river will be instructed to run around the rear of the shops so that the buildings and tracks will be unimpeded by the waters that rush down the gorge occasionally.

The old Puerco will be filled in and over this watercourse will be laid the tracks for the storing of empty cars, for car repair, tracks which it is said will be entirely under cover, for the making up of trains and for general switching purposes. Gallup will feel somewhat lost for a time with the loss of the switch engine eliminated from the midst of every interesting conversation, de-lamination, or song or orchestra selection or practically everything that one thinks he certainly would like to hear. Usually when public entertainments are being given they are usually interrupted ten or twelve times by the deafening roar of a switch engine.

Miner Hart at Allison. J. O. McGinnis was fatally and A. Welch seriously injured by a fall of rock in the Diamond Coal company's mine at Allison Thursday. It is feared McGinnis has a broken back. Welch who is a member of the local baseball team has a broken hip. He will recover.

WORK REIGNS ON THE QUESTA-TAOS ROAD

Taos, N. M., Aug. 9.—Work has been commenced on the Questa-Taos road along the survey made recently by H. K. Morgan of the state engineer's office. The road is being built under the direction of Guy Newby.

The heaviest part of the grade will be completed first, this being from the Red river crossing near the residence of Luis Belmont and extending to the top of the mesa near the Bet Luce farm. It is the intention of the state highway commission to open the road as far as possible with the funds now on hand, made available by the five mill special levy imposed in 1914 for this purpose. However, it is estimated that at least \$10,000 will be required to build this road according to the state engineer's specifications.

THANKING YOU FOR YOUR COURTESY IN ACKNOWLEDGMENT, I AM,

Very truly yours,  
W. L. HOLGETT.

The roulette wheel, the cold deck and the men who operated them were out of business here at least ten years ago, and since then Deming and the Mimbre valley boast a collection of citizens excelled by no other section of the country.

In these hustling times it takes men of brains to run a country like the Mimbre valley, and the gambler and the profiteer have no place here.

If the tourist friends of Mr. Holgett want to find bad men, gamblers and their kind they should stay in New York or some of the eastern cities, where human life is so cheap and where the Ten Commandments have been forgotten long ago.

**SKELETON OF LONG DEAD UNKNOWN FOUND**

MONTANA, N. A., Aug. 9.—The remains of an unknown white man were found Saturday night or nine miles from here by two Mexican boys. Although the boys recognized their friend there was nothing left on the body to aid in identification.

The bodies had been sleeping between Marfa and Hawley, on the south side of the railroad. Saturday morning they found the remains of a white man in a secluded spot on top of the mesa. From all indications he wandered there and sat down by or beneath a large rock and died in that position apparently more than a year ago. He had on winter clothes and quite a collection of things that a man on the road would carry with him. A newspaper with a date of March, 1914, was the only thing that could be found to indicate the time he had died, as a pack of rats had devoured his pockets of all other things and deposited them in the crevices of the rocks where they could not be gotten to by those trying to identify the body.

**DENVER GENTLEMAN FAILS TO FIND OLD WEST AT DEMING**

Deming, N. M., Aug. 9.—How tame the wilderness and wildness of the west still is, is evidenced by a story printed this week by the Deming Headlight. It goes as follows:

Promoter W. E. Foutts has received the following letter from a cowboy in Denver, Colorado, who wants to be able to inform his tourist friends from the east, two presume they are from the east, two presume they are from the west, two presume they are from the north, two presume they are from the south, the she wolf from Butter Creek and all those picturesque char-

**LORDSBURG PLANS A GIANT CELEBRATION OF ROAD'S COMPLETION**

Lordsburg, N. M., Aug. 9.—A giant celebration of the completion of the new spur to the \$2 mine will be held here Labor day, the festivities which usually attend the celebration of that day being combined with others in recognition of the benefit this road will be to this section.

The principal event will be the driving of the copper spike connecting the main line of the Arizona & New Mexico railway with the spur to the Virginia mining district, and also Labor day.

The officials of the A. & N. M. expect to have the road completed by that date, however, ore hauling from Shoshone spruce already has begun over the new spur. There is another month's work to put the finishing touches to the curves and right of way, but by September 6 everything is expected to be ready.

**MAGDALENA SCHOOLS START NEW TERM IN EXCELLENT CONDITION**

Manguliana, N. M., Aug. 9.—Magdalena's public schools will start the new term in the best condition they have ever attained. The trustees of the Magdalena district have been having the buildings and grounds renovated and cleaned up for the coming term which will open the first Monday in September and they now are in fine shape.

The buildings have been thoroughly overhauled, painted wherever needed, and in fact thoroughly cleaned. The walls and floors have been secured and whitewashed until they are clean enough to spread your dinner on.

Just before school opens the rooms will be thoroughly fumigated, and if any disease germs have been left after the cleaning the rooms have already reacted, that will surely get it.

New equipment has been installed to take care of the manual training department and the domestic science classes. The latter department is fitted up with an up-to-date range and the late things in sanitary cooking utensils, and these departments will be two of the most popular, both to pupils and patrons, during the coming school term.

One hundred fifty-five foot bridge over Plaza Largo, \$1,815; two hundred forty-eight foot over Barrancas creek, \$2,330; three hundred ten foot over Trujillo creek, \$3,213; one hundred fifty-five foot over Ball creek, \$1,994; one hundred twenty-four foot over Mineral creek, \$1,620. Total, \$16,710. The bid of the Midland Bridge and Iron company totaled \$11,981, and that of Messrs Funk and Hall \$12,008. The work of construction is to begin soon and be completed by January 2, 1916. The Plaza Largo and Barrancas bridges will be built first.

**Save The Baby Use the reliable HORICK'S ORIGINAL Malted Milk**

Endorsed by thousands of Physicians, Mothers and Nurses the world over for more than a quarter of a century.

Convenient, no cooking nor additional milk required. Simply dissolve in water.

Agree when other foods often fail.

Sample free, HORICK'S, Racine, Wis.

No Substitute is "Just as Good" as HORICK'S, the Original

## FEARS HELD FOR SAFETY OF TRADER
